BTV Green Initiative

My teammates and I, from NSU, AIUB, BRAC and AUST and some school students, came together for a green initiative. We collected around 5,000 BDT through personal contributions. With that fund, we bought 400 small trees to support a cleaner and greener environment. After planning everything, we chose the BTV Roundabout, a divider between the roads as our planting spot, as it needed more greenery and is a visible public place. Together, we planted all 400 trees along the divider between the roads. It was a great experience of teamwork and unity for a good cause. This small effort made us feel proud, and we hope it will inspire others to take steps toward a better and greener future. We believe that even small actions can make a big difference when done together.

In these pictures, we can see the impact of our collective contribution.
